

# Value AddOn Solution Package Deploy

With the FSS Value AddOn Solution Package deploy, full packages can be fully deployed in a customer-defined rhythm. With this enhancement, JD Edwards EnterpriseOne installations are always up to date and system expansions and developments are always available in a guaranteed rhythm.

Data Source	Path Code	Package Name	Build Date	Build Time	Mode	Recurrence	Last Build Date	Build Status	User ID	Date Updated	Time Updated

## Requirements and functionality

Full packages are deployed automatically with the FSS Value AddOn Solution Package deployed to a customer-defined rhythm.

## Customer benefits / value added

In large, international organizations, it makes sense to deploy full packages automatically. Too high is the risk that new adjustments and developments will not be deployed promptly with a full package. This problem no longer exists with the FSS Value AddOn Solution Package deploy.
