

Value AddOn Solution Resource Centre

With the FSS Value AddOn Solution JDE Resource Center you can provide files to download to all stakeholders. Own employees as well as developers or consultants can exchange files or make them available for download. Manage your know-how in the place where it is needed.

Requirements and functionality

The FSS Value AddOn Solution is set up within a few hours and is displayed as an E1 Page for the respective users. On this page you can access templates, guidelines, news and other important files and make them available to download to your users.

Customer benefits / value added

By centrally managing the files in JD Edwards EnterpriseOne, know-how or files are available exactly where they are needed. This saves, especially in large organizations, the search in various storage locations (local servers, non-global structures) and avoids any internal authorization structures for drives or web pages.
